This printer is a thermal transfer printer, whose print head must be able to move across the surface of the CD-R. Because of this, satisfactory printing results may not be possible if you try to print on a ink jet printable disc, or on a disc whose lable has a rough surface or some design within the area printed by the printer.

We recommend that you print on the CD-R media before storing data on it. Note that CASIO makes no guarantees concerning the loss of data caused by label printing. Before purchasing this product, understand that CASIO shall not be held responsible for any legal claims arising through the use of this product, including but not limited to those involving recorded media contents. This printer cannot be used to write data onto a CD-R. The color of a disc label can affect the printing color.
