EVEREST™ II

Advancing the art of digital delivery.

ADVANCING THE ART OF SPEED AND QUALITY

Introducing Everest™ II, the next generation thermal retransfer CD/DVD label printer. It's better, faster and more affordable than ever. Everest II speeds through every job, printing labels in less than 60 seconds. Imagine how much you can accomplish! And the offset-quality printing is even better than before, producing solids and photographic images alike with more vibrant colors and enhanced color management and color matching, and increased clarity and sharpness of image quality. Everest II continues to reproduce colors, text and graphic images at an amazing 173 lines per inch (lpi)—leaving traditional screen printing (90 lpi) in the dust and even surpassing magazine print standards (133 – 150 lpi). It even gives you the option to print edge-to-edge, on the hub, and prints labels that look exactly like what you see on screen.

THE BEST TECHNOLOGY AND THE BEST VALUE

Everest II not only revolutionizes CD and DVD label printing—again, it also comes complete with a significant cost savings on every label you print. A 30% reduction in the cost of Everest consumables means that you can print full-color, full-coverage labels for less than \$0.30 per disc. The wide range of available Everest compatible media ensures that you can do more with less—and that makes Everest II not only the best printing technology, but also the best value.

EVEREST™ II

- Speed—labels in less than 60 seconds
- Unprecedented permanence and durability
- Flexibility for a wide variety of applications
- High-intensity color, monochrome and grayscale

RIMAGE EVEREST™ II PRINTER

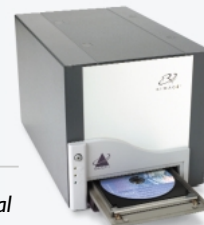

BUILDING ON A QUALITY REPUTATION

With enhanced printing, faster performance and significant cost savings, Everest II is the most advanced print technology available today—just what you'd expect from the world leader in quality CD/DVD publishing solutions. We're committed to finding new and exciting ways to make your business more efficient, through constant innovation and unparalleled engineering expertise.

A SOLUTION FOR EVERY CHALLENGE

You may only need one-of-a-kind unique label printing, or perhaps you need thousands of the same—Rimage has an Everest solution for every CD/DVD printing challenge. From the Everest II Standalone unit, perfect for one-off and low volume label printing, to the Rimage Autostar II CD or DVD publisher for high volume commercial environments—Everest II printing technology is paired with a range of Rimage publishing solutions to meet every data publishing, duplication, storage or printing need.

Photo-realistic Everest print technology provides a diverse palette for high-impact marketing messages and serial numbers alike. Achieve stunningly vibrant, durable results every time.

The Everest II Standalone is ideal for one-of-a-kind label printing.
